

## Access Panel

APK

### Ligature Resistant Access Panel

#### Description

Ligature resistant access panels to allow ease of operation yet protect against abuse and self harming. These secure steel panels are manufactured to allow ease of the access to vital services yet guard against physical abuse and the risk of fire.

Fitted with a heavy duty keyed lock. For projects that do not have a chase or duct, an alternative front mount installation option is available.

Based around the highest possible form of security for residents/ patients and staff, the anti-ligature vision panel is easy to use, secure and safe. The panel has no holes, openings or lips which could be used as a ligature point.

#### Installation

- Mark out the location of the hatch
- Cut out the opening
- Secure the access panel into the opening using the security torx screws provided
- We recommend that all access panels are also sealed around all sides with antipick mastic.

#### Operation

To open the access panel, unlock the latch on the face of the access panel, allowing the door to swing freely. To return to the locked position, push the panel back into the recess.

#### Maintenance

Care should be taken to ensure that the lock remains functional and free from signs of damage.

#### Cleaning

Use only a damp cloth to clean the access panel, where necessary a mild detergent can be used.

In the absence of a legal or industry definition of anti-ligature or ligature resistant products, when we use these terms, we are referring to products that are designed and manufactured with the intention of reducing the risk of ligature attachment to the product(s). Wallgate will always endeavour to design and test our anti-ligature product(s) to reduce the risk of product ligature attachment that may result in serious injury or death. Whilst all reasonable measures are taken at the time of design, the anti-ligature design of the products are not intended to and will not:

- a. Replace protective measures that need to be taken in the specific circumstances of usage;
- b. Substitute the need for supervision of those who may be at risk;
- c. Protect and or prevent those at risk against any self-harm instances that may occur when installed; and
- d. Protect and or prevent injury when the risks were unknown to us at the time of the design of the product(s).

Wallgate and The Intersan Group do not offer and do not represent or warrant that any product(s) for sale that are ligature-free. Therefore, Wallgate and The Intersan Group will not be liable for any claims, loss, or damages arising from ligature attachment on our products. It is the purchaser's responsibility to ensure that products purchased and installed are suitable for the environments in which they are installed, and suitable supervision and protective measures are in place to protect those at risk.

Whilst all reasonable care has been taken in compiling the information in this document, the designs, dimensions and products shown are indicative only and should not be relied upon without our prior approval. Due to our policy of continuous development, we reserve the right to alter any details of specifications or products without notice. All information, drawings, technical specifications and product designs remains the property of Galvin Engineering Pty Ltd.
