### Features

The line 13 is a sensor operated faucet. The faucet body is made from chrome plated lead free brass.

The sensor responds to objects approaching the sensor. The response time is 0.5 seconds and stops once the object leaves the sensor range.

The waterflow will automatically stop after one minute. In this case there will be a time-out of 10 seconds.

The waterflow will stop if the power is interrupted or out. This to minimize the waste of water.

If powered by 4 x AA batteries, the battery life will be around 2 years at 300 cycles a day.

### Technical Specifications

- Power supply:
  - AC: 110
  - DC: 4 x AA batteries
- Battery Life: 220,000 water cycles
