

SHOWER DRAIN

LRSHD

Anti-Ligature Shower Drain

Material and Construction

The shower drain stainer is made from 304 stainless steel. The clamping nut is made from brass.

Operation

The shower drain is designed to replace the existing strainer and clamping nut on select shower drains from Oatey and Zurn. The hole pattern and thickness of the stainer of the AquaDesign drain helps prevent the risk of ligature.

How does it work?

Step 1:
Existing shower drain

Step 2:
Remove Screen

Step 3:
Remove Clamping Nut

Step 4:
Install new clamping nut

Step 5:
Install new screen

001	Base Model Number (must specify)
