Features

One of the great features of the U700100 wall mounted faucet is that it is not only made from stainless steel 304 but it comes with LEDs that surround its front panel which is stylish and can also act as an indicator. Solid blue light means the auto faucet is in the standby mode, when users' hands approach and trigger the sensor, the blue light will turn red when supplying water. Still, with the auto detecting sensor and the interacting LEDs, standby power is only less than 0.1W.

Technical Specifications

- Power Source: AC type
- Operating Voltage: 110V-220Vac, 50/60 Hz, 5W
- Standby Power: 0.1W
- Shut-off Delay Time: 1sec
- Time out Setting: 60sec
- Flow Rate: Max. 2.2GPM/8.3LPM
- Operating Water Pressure: 7 - 87 PSI
- Water Supply Connection: 1/2"
- Mounted on a Single-Hole Wall (1-3/8")
- Applicable Water Temperature: 39°F - 140°F)
- Patented: Taiwan, China, United States, EU

In the Box:

- Sensor Faucet
- Plug-in transformer

Warranty

1 year limited warranty.
