Description

Touch free electronic foam soap dispenser for deck mounted installations. Activated by infra-red sensor. Chrome plated body. Includes a 1.5 liter soap bottle and bottle support.

Designed with a peristaltic pump and micro air pump that prevents clogging and back flow.

Adjustable settings by included remote control: soap quantity, sensor range, default settings.

Operation

Touch-free soap dispenser operated by infrared sensor. The soap dispenser automatically activates when users place their hands within sensor range, providing a measured amount of soap (adjustable by remote control). If the users remove their hand before the full amount is dispensed, the soap dispenser immediately stops the soap flow.

Application

With the dripless shutoff, this soap dispenser helps restroom organization and cleanliness. Combined with a sensor faucet, it creates a germ-free automated environment. Ideal for all public restrooms.

Warranty

One year limited warranty.
