## Ligature Resistant Drain for Showers

---

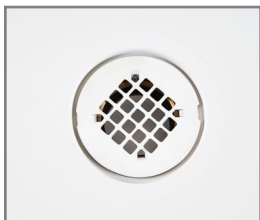

The LRHSD is a ligature resistant drain specially designed to minimize the risk of self harm and suicide using a technique called the “crocodile roll”.

The LRHSD is designed so the existing shower drain screen and clamping nut can easily be replaced with a ligature resistant version. The screen and clamping nut work on tiled showers and also on solid surface and acrylic shower pans.

## How does it work?

---

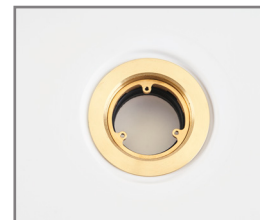

**Step 1:**  
Existing shower drain

**Step 2:**  
Remove Screen

**Step 3:**  
Remove Clamping Nut

**Step 4:**  
Install new clamping nut

**Step 5:**  
Install new screen

## Technical

---

- Material Screen and screws: 304 stainless steel
- Material clamping nut: brass
- Clamping nut available for:
  - Oatey 140-series brass no-caulk shower drain bodies
  - Zurn FD2275-BR2 brass no-caulk shower drain bodies
