SD12

Sensor Foam Soap Dispenser

The SD12 touch free sensor soap dispenser is activated automatically when hands are placed in the detection range. The dispenser dispenses 2 ml of foam soap with each activation.

The SD12 comes standard with a 1500 ml soap reservoir, battery pack and a remote control. The remote control allows the building owner to adjust the amount of soap dispensed and the sensor range.

With the dripless shutoff, this soap dispenser helps restroom organization and cleanliness. Combined with a sensor faucet, it creates a germ-free automated environment. Ideal for all public restrooms.

Technical

- Spout: Chrome plated brass
- Default soap dose: 2 ml
- Capacity soap container: 1500 ml
- Power supply: 4 x D-cell battery (standard)
Plug in transformer (optional)
