

OMNIA

Soap and Water Faucet

OMNIA WATER AND SOAP FAUCET

AquaDesign's Omnia was designed with aesthetics and performance in mind. The all-in-one solution offers a timeless elegant design that fits any restroom.

The deck-mounted faucet dispenses soap and water from a single spout. This highly efficient and hygienic design makes this also a retrofit friendly faucet.

The smart design of the Omnia offers affordable elegance without compromising on functionality. The faucet body is entirely made from chromed brass. The soap is contained in a 0.4 gallon soap container that can easily be removed for refilling.

AquaDesign's Omnia was designed to avoid water splashing to the floor. The Omnia design not only saves space but also allows for a faster flow of traffic in the restroom.

Technical Specifications

- Power supply:
 - AC: 110V plug-in transformer
 - Backup DC: 4 x AA batteries
- Sensor Range: 2" - 10"
- Maximum water flow duration per cycle: 60 seconds
- Recommended soap viscosity: 100-3,500 cps
- Soap container: 0.4 gallons (1.5 liters)
- Water Pressure: 8-116 psi
- Soap dose: 0.5, 1.0, 1.0 or 2.0 ml
- Water flow (at 43 psi): 0.5 gpm
- Recommended sink depth: 4-3/4"
