WDCA

Electronic Water Controller for Behavioral Suites

Dimensions	Technical	Approvals	Capacity	
4 ⁷ / ₈ " x 5 ⁷ / ₈ " x 3 ¹ / ₄ "	Powered by 120/12V plug-in transformer	IP55 Rating	<u>WDCA100</u> 4 valves 1 room	<u>WDCA200</u> 8 valves 2 rooms

Description

The WDCA range are Wallgate by AquaDesign's highly flexible and fully programmable secure environment electronic controllers. The WDCA electronic controllers allow the precise control of water flow to multiple basins, showers and toilets from a single 120V, 60Hz amp power supply. All device cable connections are fully plug and play and are external to the box with four additional inputs allowing additional features to be incorporated.

Activated by either Piezo touch button or infra-red sensor, through its simple menu system and LCD display the parameters for each device can be individual and repeatedly programmed. Capable of lockouts, timed flow and dual flush.

WDCA100

The WDCA100 Single Room electronic controller manages water flow to a maximum of four sanitary ware items including basins and toilets in a single room. However, it can also be used to operate and control multiples of identical devices such as a bank of showers.

The WDCA100 controller should NOT be "shared" among two adjoining rooms. If shared in communal mode, it does NOT provide key "Lockout" controls which is usually a requirement in secure applications. Where you plan on sharing a controller among a few fixtures in adjoining rooms, use the WDCA200 instead.

WDCA200

The WDCA200 electronic controller manages water flow to a maximum eight inputs for Wallgate by Intersan electronically controlled fixtures, including toilets, showers, basins and tubs - in a maximum of two adjoining rooms or cells sharing a common service duct. Alternatively, it can be used to drive a bank of toilets, showers or basins in a communal environment.

In addition there are a further 6 inputs that can be used to drive various functions such as dual flush, remote flush and remote cell shutdown. As every parameter within the controller is fully programmable, 5 pre-programmed default operational modes have been included in the software to simplify and shorten the set-up process. The menu has been designed to be simple to navigate around using the four input buttons mounted on the front panel and the large LCD display screen.

Feature Comparison

	WDCA100	WDCA200
Power use rating	50W	50W
Maximum number of rooms per unit	1	2
Maximum number of solenoid valve	4	8
Dual flush compatible	Yes	Yes
Timed flow and lockouts	Yes	Yes
Controls communal banks of toilets, showers or sinks	No	Yes
Network capable	No	Yes
Time slot selection for showers, etc.	No	Yes

Typical WDCA Installation

WDCA100 Controller in service duct

001	Base Model Number (must specify)	
<input type="checkbox"/>	WDCA100	Electronic Water Control (4 valves, 1 room)
<input type="checkbox"/>	WDCA200	Electronic Water Control (8 valves, 2 rooms)

In the absence of a legal or industry definition of anti-ligature or ligature resistant products, when we use these terms, we are referring to products that are designed and manufactured with the intention of reducing the risk of ligature attachment to the product(s). PSD LLC will always endeavor to design and test our anti-ligature product(s) to reduce the risk of product ligature attachment that may result in serious injury or death. Whilst all reasonable measures are taken at the time of design, the anti-ligature design of the products are not intended to and will not:

- a. Replace protective measures that need to be taken in the specific circumstances of usage;
- b. Substitute the need for supervision of those who may be at risk;
- c. Protect and or prevent those at risk against any self-harm instances that may occur when installed; and
- d. Protect and or prevent injury when the risks were unknown to us at the time of the design of the product(s).

PSD LLC does not offer and does not represent or warrant that any product(s) for sale that are ligature-free. Therefore, PSD LLC will not be liable for any claims, loss, or damages arising from ligature attachment on our products. It is the purchaser's responsibility to ensure that products purchased and installed are suitable for the environments in which they are installed, and suitable supervision and protective measures are in place to protect those at risk. Whilst all reasonable care has been taken in compiling the information in this document, the designs, dimensions and products shown are indicative only and should not be relied upon without our prior approval. Due to our policy of continuous development, we reserve the right to alter any details of specifications or products without notice. All information, drawings, technical specifications and product designs remains the property of PSD LLC.
