Description

This unique product has been designed to use in shower applications in behavioral health facilities, providing a normal as possible look and feel. It operates similar to a residential lever mixer, without the lever and assists in providing a safe environment for patients, by minimising ligature points in the shower.

Features

- The unique design concept eliminates the institutional look and provides anti-ligature and vandal resistant compliance.
- Easy operation allows the shower to be activated with your palm or fingers.
- 6-5/8" round face plate with polished stainless steel finish for a homely look, yet able to withstand heavy knocks.
- Easy temperature blending and operation to ensure comfort and safety for the user.
- Bevelled edges for maximum tight fixing.
- Designed for easy panel installation (Maximum thickness 11/16").
- Access to the rear of the unit is required to fit this product.
- If a removable panel is to be used (front mounting) then flexible hoses for water inlet and the shower outlet must be used.

Technical Information

- Inlet: 1/2" NPT - Male
- Outlet: 1/2" NPT - Male
- Headwork: Ceramic Disc Cartridge
- Working Pressure Range (psi): 8 Min - 73 Max.
- Working Temperature Range (°F): 41 Min - 194 Max.
- Nominal Flow Rate: NA
- Construction: Stainless Steel/Brass
- Finish: Polished/Chrome

Maintenance and Cleaning

Galvin by AquaDesign products should be cleaned with a soft damp cloth using only mild liquid detergent or soap and water. Do not use cleaning agents containing a corrosive acid, scouring agent or solvents. Do not use cream cleaners, as they are abrasive. Use of unsuitable cleaning agents may damage the surface. Any damage caused in this way will not be covered by warranty.

Regular maintenance should be carried out in accordance with the installation and troubleshooting guides provided with the product, relevant standards, local authorities and state codes.

In the absence of a legal or industry definition of anti-ligature or ligature resistant products, when we use these terms, we are referring to products that are designed and manufactured with the intention of reducing the risk of ligature attachment to the product(s). Galvin Engineering Pty Ltd will always endeavour to design and test our anti-ligature product(s) to reduce the risk of product ligature attachment that may result in serious injury or death. Whilst all reasonable measures are taken at the time of design, the anti-ligature design of the products are not intended to and will not:

- a. Replace protective measures that need to be taken in the specific circumstances of usage;
- c. Protect and or prevent those at risk against any self-harm instances that may occur when installed; and
- b. Substitute the need for supervision of those who may be at risk;
- d. Protect and or prevent injury when the risks where unknown to us at the time of the design of the product(s).

Galvin Engineering Pty Ltd and AquaDesign Manufacturing do not offer and do not represent or warrant that any product(s) for sale that are ligature-free. Therefore, Galvin Engineering and AquaDesign Manufacturing will not be liable for any claims, loss, or damages arising from ligature attachment on our products. It is the purchaser's responsibility to ensure that products purchased and installed are suitable for the environments in which they are installed, and suitable supervision and protective measures are in place to protect those at risk.

Whilst all reasonable care has been taken in compiling the information in this document, the designs, dimensions and products shown are indicative only and should not be relied upon without our prior approval. Due to our policy of continuous development, we reserve the right to alter any details of specifications or products without notice. All information, drawings, technical specifications and product designs remains the property of Galvin Engineering Pty Ltd.
